OUR STORY

Abhati is an ancient Sanskrit word meaning shine. Founded by Anju Rupal, Abhati represents a collection of scientifically proven beauty products, steeped in spiritual healing virtues and traditional expertise.

OUR VALUES

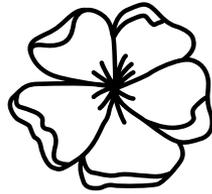

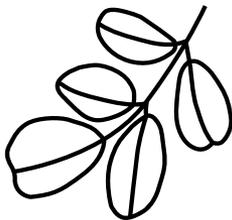

Abhati is an ethically-minded skincare brand, deeply influenced by its Indian heritage. Abhati works tirelessly to empower the craftspeople involved in the production of its range and fund local education initiatives. We work closely with educategirls.in and weforest.org, two NGOs that support emerging communities and sustainable development throughout India.

Abhati has been certified by B Corp for its work. B Corp companies are dedicated to using the power of business as a force for good.

OUR HERO INGREDIENTS

MORINGA SEED OIL

The oil is obtained by pressing the seeds of the Moringa Oleifera tree, which is native to the Himalayan foothills. It is frequently called «Tree of Life» and is widely used in holistic medicine. When pressed, the seeds release 40% oil, making Moringa one of the most nutrient-dense seeds in the world, high in GLA antiaging gamma Linolenic acid. This oil is light and rich in vitamins A and C, unsaturated fatty acids and because it has great amounts of oleic acid, it penetrates skin very deeply. Excellent for balancing sebum and fighting toxins.

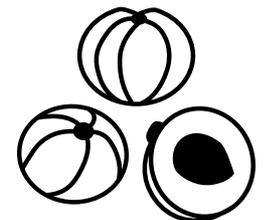

HIMALAYAN WILD CHERRY OIL

Himalayan Wild Cherry Oil is found in the high altitudes of the Himalayas between 1,800 and 3,000 metres. It is rich in Omega 6 & 9, high in Oleic & Linoleic acids and features important fatty acids for glossy, healthy hair and skin. We love working with this oil as it's harvested by our tribal farmers who earn a sustainable income through harvesting. The oil is produced from hand-picked wild fruits matured from May to June. Seeds are then laid out for sun drying then cold-pressed to extract the oil, a process which preserves its nutrients.

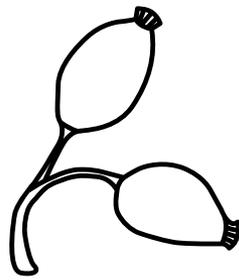

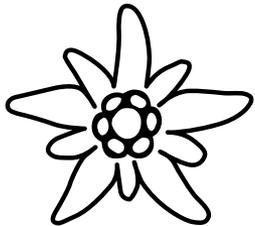

AMLA

Indian Gooseberry (Amla), is a centuries-old Indian secret to healthy hair. Native throughout India, Amla, is a green fruit that is incredibly high in tannin and has 20 times more concentrated Vitamin C than an orange. It's the powerhouse of antioxidants and Vitamin C. We use it to encourage healthy hair growth and improve pigmentation and harness its AHA acids as a gentle exfoliant. Amla stimulates hair at the roots where it contributes to lustrous hair growth, preserves pigment and helps prevent premature greying. Amla is an exceptional natural conditioner that infuses hair with nutrition that protects against environmental aggressors, whilst promoting growth and helping diminish split ends, dryness and dandruff.

EDELWEISS

This seemingly delicate Swiss flower is our strongest ally in self-protection. Found at very high altitudes, Edelweiss is constantly exposed to extreme climates and harmful UV radiation. Its resilience is what we harness to help protect skin and rebalance environmentally-induced stress. This provides vital support for the skin's natural protection processes.

ROSEHIP SEED OIL

Rosehip grows wild in the Himalayan Mountains. Ours is still harvested by tribal farmers. This age defying oil is a natural source of Vitamins A & C, boosts cellular renewal, collagen production and reverses sun damage. Recent studies have proven its ability to contribute to the reduction and prevention of wrinkles and age spots. Its high concentration of retinoic acid (Vitamin A) helps improve cell regeneration and stimulates collagen and elastin levels, while smoothing fine lines and delivering a healthy glow. Rosehip Seed Oil also contains essential fatty acids and Vitamin E which contribute to the reduction of pore size. We are particularly fond of its benefits to those with eczema, psoriasis, wrinkles, age spots (brown spots), scars, hyperpigmentation and dermatitis.

ALPINE WATER

Abhati sits in the foothills of the Swiss Alps in a beautiful region called Appenzell. We source spring water from the Alpstein region. This pure water, which springs crystal clear and ready-filtered from the source, is of excellent quality and exceedingly pure. This means we are able to use it without further processing – straight from the source. Our spring water gives our products a unique purity and quality thanks to its salt and mineral content.

Wild crafted & collected from the Himalayas, it is the richest natural source of Vitamin A (beta carotene) & Omega 7 and loaded with tocopherols (Vitamin E). Our tests have shown that it contains high levels of salicylic acid, a gentle exfoliator, which is ideal for lips.

NOMADIC TRAVEL KIT

**MAHANADI LIP TREATMENT, 10 ml
SHAMPOO, CONDITIONER, BODY
CLEANSER, BODY LOTION, EACH 50 ml
87 USD**

This five-piece travel set contains some of our best products. Ideal in size and content, it provides excellent care for body and mind during travels.

LEGEND HAS IT.... THERE ONCE LIVED A PRINCESS NAMED CHITRANGADA.

She was admired by all, not only for her beauty, but for her unparalleled skill in battle. But the battles had left scars and bruises. One day, while in the Himalayas, she discovered an exotic plant that was cool and soothing to the skin. She asked the Royal Chemist to mix it with other rare oils and botanicals, which she applied to her scars. It healed and protected her skin for years to come.

Chitrangada shared her oil with the Queens and Princesses of Rajput who were also competent swordswomen, so that cuts, burns and all other reminders of defeat should never mar their beautiful complexions. We are very fortunate to have that recipe, passed down generations by the family of the Royal Chemists who prepared this powerful salve.

KAYLANA

RARE OIL, 30 ml, 215 USD

The formulation on which Kaylana is based is known to be the first face oil used by women & men during the Mughal reign. It is power-packed with essential fatty acids and absorbs deeply, healing the skin from within. Suitable for all skin types.

It takes over 60,000 fresh organic roses to make our rose essential oil each month, of which 65 go into each bottle of Kaylana. The rose petals are grown biodynamically by our farmers on the foothills of the Himalaya. Organic plants have, on average, 45% more antioxidants than conventional plants, no toxic pesticide residue and their harvest contributes to a more healthy and sustainable land mass. Our highly targeted botanicals also help protect against environmental stressors like pollution.

LALITYA

WHIPPED MOISTURISING CREAM, 60 ml, 57 USD

This ultra-light whipped facial cream will be absorbed by the skin in seconds, leaving nothing but a beautiful, subtle fragrance and incredible softness. Suitable for all skin types.

A rich and light-weight moisturiser that leaves skin smooth and dewy, Lalitya helps reduce redness and tightness as it supports your skin's own self-protection faculties. It also contains our unique skin barrier formulation, combining Edelweiss, Amla and Turmeric.

Our natural form of Retinol comes from Himalayan Wild Cherry Oil. Thanks to its high Vitamin A content, it provides hydration, evens skin tone and reduces the appearance of wrinkles.

SHANTA

RICH FACIAL CLEANSER, 75 ml, 42 USD

This 2-in-1 cleanser is ideal for all skin types. Purify, hydrate and protect even the most sensitive skin. Our formulation contains rare botanicals like Indian Gooseberry, Wild Turmeric and Edelweiss.

The gel massages into pores as a luxurious serum and deeply purifies, then emulsifies with warm water to create a non-foaming cleanser, gentle but concentrated enough to effectively remove eye makeup.

This facial cleanser minimises redness, reduces irritation and stimulates microcirculation as it leaves skin feeling clean, supple, smooth and refreshed, ready for care. Repeated use will restore your skin's natural balance and gently exfoliate with AHA Fruit Acids.

OUR FORMULAS

Created in collaboration with award-winning perfumer Geza Schoen, our intense allergen-free, long-lasting gender-neutral scent contains a very unique and complex combination of citrus, floral and spice notes made from hand-crafted Abhati oils.

Our rigorous clinical quality tests never involve animals. All our products are biodegradable and have been obtained from renewable resources.

Abhati products are not only toxin and cruelty-free, they also possess a sattvic quality, which means we are committed to not harming any living being. Sattva (Sanskrit) is the quality of goodness, positivity, truth, wholesomeness, serenity, holistic balance, confidence, peace and virtue.
